## Critical Infrastructure Protection III

Third IFIP WG 11.10 International Conference, Hanover, New Hampshire, USA, March 23-25, 2009, Revised Selected Papers

The information infrastructure – comprising computers, embedded devices, networks and software systems – is vital to day-to-day operations in every sector: information and telecommunications, banking and finance, energy, chemicals and hazardous materials, agriculture, food, water, public health, emergency services, transportation, postal and shipping, government and defense. Global business and industry, governments, indeed society itself, cannot function effectively if major components of the critical information infrastructure are degraded, disabled or destroyed. Critical Infrastructure Protection III describes original research results and innovative applications in the interdisciplinary field of critical infrastructure protection. Also, it highlights the importance of weaving science, technology and policy in crafting sophisticated, yet practical, solutions that will help secure information, computer and network assets in the various critical infrastructure sectors. Areas of coverage include: risk management, control systems security, infrastructure security, infrastructure modeling and simulation. This book is the third volume in the annual series produced by the International Federation for Information Processing (IFIP) Working... *more on <http://springer.com/978-3-642-04797-8>*
